Prevention Summary

## Introduction

This Plan has been prepared for the San Carlos Apache Reservation using the Risk Assessment and Mitigation Strategies (RAMS) planning process. RAMS was developed for fire managers to be a holistic approach to analyzing wildland FUELS, HAZARD, RISK, VALUE, and SUPPRESSION CAPABILITY. It considers the effects of fire on unit ecosystems by taking a coordinated approach to planning at a landscape level, and allows users to develop fire prevention and/or fuels treatments programs.

The steps involved in this process included:

- Listing Management Objectives for the San Carlos Apache Reservation
- Identification of spatial Compartments for study
- Assessment of significant issues within each Compartment
- Identification of Management Objectives within each Compartment
- Identification of Fire Management Zones (FMZs) and Sub-Units
- Development of Alternative Fire Prevention Program Options
- Creation of Personnel and Other Expense Prevention Budgets
- Identification of Detailed Prevention Work Programs
- Development of a total Fire Prevention Program and budget.

### Management Objectives

The following Management Objectives were identified for the San Carlos Apache Reservation:

- 1: Reduce the human-caused starts in the WUI another 13% within the first fire season of new WFPP funding. (Source: Tribal/Agency Prevention Staff)
- 2: Send one more Tribal and Agency staff to FI-210 within first year of new funding, ie, 2010. (Source: As above.)
- 3: Develop and initiate a Juvenile Firesetter Intervention Program on the Reservation with a full compliment of program supporters, esp with the new Housing Security Director. (Source: As above.)
- 4: Working with Tribal Fuels, begin to initiate WUI defensible space treatments according to NFPORS in the San Carlos/Peridot communities. (Source: As above.)

### Compartment Design Criteria:

Per the new FPA jargon, utilize FMU and FWA as synonymous, replacing the old compartment, representative locations and fire management zones of the old FMPA.

## Compartment Listing

Code	Description
1	FWA_SCA_EE
2	FWA_SCA_Sonoran
3	FWA_SCA_WUI

Detailed information about each Compartment follows.

## **Compartment 1: FWA\_SCA\_EE**

### **Part I**

Compartment 1 contains 1353442 acres in Fire Management Zone 01. Representative Locations (RLs) and the percents in this Compartment are: 1 (100%). The Compartment experiences 0.00 fires per year, totaling 0 acres. The characteristics of the compartment indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 4 - 6 Feet (**Moderate**)  
Crowning Potential: 3 - 5 (**Moderate**)  
Slope Percent: 31 + (**Moderate**)  
Aspect: North (**Low**)  
Elevation: 4001 - 6000 (**Moderate**)

Protection Capability ratings are:

InitialAttack: 21+ minutes (**High**)  
Suppression Complexity: Complex (**High**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface  
0-100 Dwellings/structures

Power Lines In Unit  
Distribution Lines

Industrial Operations  
Active timber sale  
Construction project  
Maintenance/service contracts

Recreation  
Dispersed camping areas, party areas, hunters, waterbased, hiking  
Developed camping areas  
Off highway vehicle use

Flammables Present  
Gas pumps or storage

Other  
Electronic installations  
Fireworks, children with matches  
Woodcutting area, power equipment  
Shooting/target  
Government operations  
Incendiary  
Cultural Activities  
Dump

Transportation System  
County road(s)  
Public Access Road(s)

Commercial Development

Schools

Camps, resorts, stables

Business, agricultural/ranching

## **Compartment 1: FWA\_SCA\_EE Part II**

Compartment Values are characterized:

Recreation: Undeveloped high recreation use (**Moderate**)

Administrative: Few or no administrative sites (**Low**)

Wildlife/Fisheries: Highly significant habitat. (**High**)

Range Use: Range allotment within area, significant use (**High**)

Watershed: Stream Class I, II. Rocky, little riparian vegetation. No specific water use. Low hazard. (**Moderate**)

Forest/Woodland: Standing timber/woodland on 26 - 50% of area (**Moderate**)

Plantations: 15% or less of area in or programmed for plantations (**Low**)

Private Property: Little or no threat or loss potential (**Low**)

Cultural Resources: Archaeological/historical findings of high significance (**High**)

Special Interest Areas: A majority of the area is classified as Special Interest area (**High**)

Visual Resources: Partially retain existing character. (**Moderate**)

T&E Species: Species present. (**High**)

Soils (Erosion): Highly erodable (EHR 13+). (**High**)

Airshed: Moderate receptor sensitivity (**Moderate**)

Vegetation: Potential for sensitive plants. (**Moderate**)

## **Compartment 2: FWA\_SCA\_Sonoran Part I**

Compartment 2 contains 411450 acres in Fire Management Zone 01. Representative Locations (RLs) and the percents in this Compartment are: 2 (100%). The Compartment experiences 0.00 fires per year, totaling 0 acres. The characteristics of the compartment indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 4 - 6 Feet (**Moderate**)  
Crowning Potential: 6 + (**High**)  
Slope Percent: 0-20 (**High**)  
Aspect: South (**High**)  
Elevation: 2040 - 4000 (**High**)

Protection Capability ratings are:

InitialAttack: 11 - 20 minutes (**Moderate**)  
Suppression Complexity: Average (**Moderate**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface  
0-100 Dwellings/structures

Power Lines In Unit  
Transmission Lines  
Distribution Lines  
Sub-station

Industrial Operations  
Construction project  
Maintenance/service contracts

Recreation  
Dispersed camping areas, party areas, hunters, waterbased, hiking  
Off highway vehicle use

Flammables Present  
Gas or oil wells/transmission

Other  
Electronic installations  
Fireworks, children with matches  
Woodcutting area, power equipment  
Shooting/target  
Government operations  
Cultural Activities  
Dump

Railroads  
Railroads are present

Transportation System  
State/Federal highway(s)

County road(s)  
Public Access Road(s)  
Commercial Development  
Business, agricultural/ranching

## Compartment 2: FWA\_SCA\_Sonoran Part II

Compartment Values are characterized:

Recreation: Undeveloped average recreation use (**Low**)

Administrative: Few or no administrative sites (**Low**)

Wildlife/Fisheries: Moderately significant habitat. (**Moderate**)

Range Use: Range allotment within area, significant use (**High**)

Watershed: Stream Class I, II. Rocky, little riparian vegetation. No specific water use. Low hazard. (**Moderate**)

Forest/Woodland: Standing timber/woodland on 25% or less of area (**Low**)

Plantations: 15% or less of area in or programmed for plantations (**Low**)

Private Property: Little or no threat or loss potential (**Low**)

Cultural Resources: Minimal archaeological/historical findings, potential for Native American use. (**Moderate**)

Special Interest Areas: No Special Interest area within or adjacent to the area (**Low**)

Visual Resources: Partially retain existing character. (**Moderate**)

T&E Species: Species present. No confirmed use for reproduction (**Moderate**)

Soils (Erosion): Highly erodable (EHR 13+). (**High**)

Airshed: Low receptor sensitivity (**Low**)

Vegetation: No sightings, little potential, minimal significance (**Low**)

## **Compartment 3: FWA\_SCA\_WUI Part I**

Compartment 3 contains 85110 acres in Fire Management Zone 01. Representative Locations (RLs) and the percents in this Compartment are: 3 (100%). The Compartment experiences 284.00 fires per year, totaling 1,126 acres. The characteristics of the compartment indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

- Fuels (flame length produced): 8 + Feet (**High**)
- Crowning Potential: 6 + (**High**)
- Slope Percent: 0-20 (**High**)
- Aspect: South (**High**)
- Elevation: 2040 - 4000 (**High**)

Protection Capability ratings are:

- InitialAttack: 0 - 10 minutes (**Low**)
- Suppression Complexity: Average (**Moderate**)

Ignition Risk factors include:

- Population Density - Wildland Urban Interface
  - 1001+ Dwellings/structures
- Power Lines In Unit
  - Transmission Lines
  - Distribution Lines
  - Sub-station
- Industrial Operations
  - Construction project
  - Debris/slash burning
  - Mining
  - Maintenance/service contracts
- Recreation
  - Dispersed camping areas, party areas, hunters, waterbased, hiking
  - Off highway vehicle use
- Flammables Present
  - Gas pumps or storage
  - Gas or oil wells/transmission
- Other
  - Fireworks, children with matches
  - Electronic installations
  - Woodcutting area, power equipment
  - Shooting/target
  - Government operations
  - Incendiary
  - Cultural Activities
  - Dump

Railroads

Railroads are present

Transportation System

State/Federal highway(s)

County road(s)

Public Access Road(s)

Commercial Development

Business, agricultural/ranching

## **Compartment 3: FWA\_SCA\_WUI Part II**

Compartment Values are characterized:

Recreation: Undeveloped high recreation use (**Moderate**)

Administrative: Administrative sites are present (**Moderate**)

Wildlife/Fisheries: Relatively insignificant habitat. (**Low**)

Range Use: Little or no range use (**Low**)

Watershed: Stream Class I, II. Rocky, little riparian vegetation. No specific water use. Low hazard. (**Moderate**)

Forest/Woodland: Standing timber/woodland on 25% or less of area (**Low**)

Plantations: 15% or less of area in or programmed for plantations (**Low**)

Private Property: Threat to structures and property (**Moderate**)

Cultural Resources: Minimal archaeological/historical findings, potential for Native American use. (**Moderate**)

Special Interest Areas: Area is adjacent to a Special Interest area (**Moderate**)

Visual Resources: Partially retain existing character. (**Moderate**)

T&E Species: Species present. No confirmed use for reproduction (**Moderate**)

Soils (Erosion): Moderately erodable (EHR 4-12). (**Moderate**)

Airshed: Low receptor sensitivity (**Low**)

Vegetation: Potential for sensitive plants. (**Moderate**)

7	Seneca Lake

Detailed information about each Community follows.

## **Community 1: PointofPines/Cienega Part I**

Community 1 is located within Compartment 1 (FWA\_SCA\_EE), and its WUI type is best characterized as Intermix. The community is potentially threatened BY public land. The community is a potential threat TO public land. The characteristics of the community indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 8 + Feet (**High**)

Crowning Potential: 6 + (**High**)

Slope Percent: 31 + (**Mod**)

Aspect: South (**High**)

Elevation: 6001- 8282 (**Low**)

Protection Capability ratings are:

InitialAttack: 21+ minutes (**High**)

Suppression Complexity: Complex (**High**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface

0-100 Dwellings/structures

Power Lines In Unit

Distribution Lines

Industrial Operations

Maintenance/service contracts

Recreation

Off highway vehicle use

Developed camping areas

Dispersed camping areas, party areas, hunters, waterbased, hiking

Other

## Community 1: PointofPines/Cienega Part II

Community Values are characterized:

Recreation: Developed recreation site within or adjacent to area (**High**)

Administrative

Wildlife/Fisheries: Highly significant habitat. (**High**)

Range Use

Watershed: Stream Class PI, I. Important water use/riparian area. Domestic water use. (**High**)

Forest/Woodland: Standing timber/woodland on 26 - 50% of area (**Mod**)

Plantations

Private Property: Threat to structures and property (**Mod**)

Cultural Resources: Archaeological/historical findings of high significance (**High**)

Special Interest Areas: A majority of the area is classified as Special Interest area (**High**)

Visual Resources: Partially retain existing character. (**Mod**)

T&E Species: Species present. (**High**)

Soils (Erosion): Moderately erodable (EHR 4-12). (**Mod**)

Airshed: Moderate receptor sensitivity (**Mod**)

Vegetation

## **Community 2: Ash Creek/R100/Slaug Part I**

Community 2 is located within Compartment 2 (FWA\_SCA\_Sonoran), and its WUI type is best characterized as Intermix. The community is potentially threatened BY public land. The community is a potential threat TO public land. The characteristics of the community indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 4 - 6 Feet (**Mod**)

Crowning Potential: 3 - 5 (**Mod**)

Slope Percent: 31 + (**Mod**)

Aspect: South (**High**)

Elevation: 4001 - 6000 (**Mod**)

Protection Capability ratings are:

InitialAttack: 21+ minutes (**High**)

Suppression Complexity: Complex (**High**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface

0-100 Dwellings/structures

Industrial Operations

## Community 2: Ash Creek/R100/Slaug Part II

Community Values are characterized:

Recreation: Undeveloped average recreation use (**Low**)

Administrative

Wildlife/Fisheries: Moderately significant habitat. (**Mod**)

Range Use

Watershed: Stream Class III, IV, VI. Little riparian vegetation. No mass movement potential (**Low**)

Forest/Woodland: Standing timber/woodland on 25% or less of area (**Low**)

Plantations

Private Property: Little or no threat or loss potential (**Low**)

Cultural Resources: Archaeological/historical findings of high significance (**High**)

Special Interest Areas: No Special Interest area within or adjacent to the area (**Low**)

Visual Resources: Partially retain existing character. (**Mod**)

T&E Species: Species not present (**Low**)

Soils (Erosion): Moderately erodable (EHR 4-12). (**Mod**)

Airshed: Low receptor sensitivity (**Low**)

Vegetation

## **Community 3: Bylas/Calva Part I**

Community 3 is located within Compartment 3 (FWA\_SCA\_WUI), and its WUI type is best characterized as Intermix. The community is potentially threatened BY public land. The community is a potential threat TO public land. The characteristics of the community indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 8 + Feet (**High**)

Crowning Potential: 6 + (**High**)

Slope Percent: 0-20 (**High**)

Aspect: South (**High**)

Elevation: 2040 - 4000 (**High**)

## Community 3: Bylas/Calva Part II

Community Values are characterized:

Recreation: Undeveloped average recreation use (**Low**)

Administrative

Wildlife/Fisheries: Relatively insignificant habitat. (**Low**)

Range Use

Watershed: Stream Class III, IV, VI. Little riparian vegetation. No mass movement potential (**Low**)

Forest/Woodland: Standing timber/woodland on 25% or less of area (**Low**)

Plantations

Private Property: High loss and threat potential due to numbers and placement (**High**)

Cultural Resources: Archaeological/historical findings of high significance (**High**)

Special Interest Areas: No Special Interest area within or adjacent to the area (**Low**)

Visual Resources: Partially retain existing character. (**Mod**)

T&E Species: Species present. (**High**)

Soils (Erosion): Highly erodable (EHR 13+). (**High**)

Airshed: Low receptor sensitivity (**Low**)

Vegetation

## **Community 4: San Carlos/Peridot Part I**

Community 4 is located within Compartment 3 (FWA\_SCA\_WUI), and its WUI type is best characterized as Intermix. The community is potentially threatened BY public land. The community is a potential threat TO public land. The characteristics of the community indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 4 - 6 Feet (**Mod**)

Crowning Potential: 6 + (**High**)

Slope Percent: 0-20 (**High**)

Aspect: South (**High**)

Elevation: 2040 - 4000 (**High**)

Protection Capability ratings are:

InitialAttack: 0 - 10 minutes (**Low**)

Suppression Complexity: Complex (**High**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface

## Community 4: San Carlos/Peridot Part II

Community Values are characterized:

Recreation: Undeveloped high recreation use (**Mod**)

Administrative

Wildlife/Fisheries: Relatively insignificant habitat. (**Low**)

Range Use

Watershed: Stream Class PI, I. Important water use/riparian area. Domestic water use. (**High**)

Forest/Woodland: Standing timber/woodland on 25% or less of area (**Low**)

Plantations

Private Property: High loss and threat potential due to numbers and placement (**High**)

Cultural Resources: Archaeological/historical findings of high significance (**High**)

Special Interest Areas: No Special Interest area within or adjacent to the area (**Low**)

Visual Resources: Partially retain existing character. (**Mod**)

T&E Species: Species present. (**High**)

Soils (Erosion): Highly erodable (EHR 13+). (**High**)

Airshed: Low receptor sensitivity (**Low**)

Vegetation

## **Community 5: Cooidge Dam/BylasRan Part I**

Community 5 is located within Compartment 3 (FWA\_SCA\_WUI), and its WUI type is best characterized as Intermix. The community is potentially threatened BY public land. The community is a potential threat TO public land. The characteristics of the community indicate that: Catastrophic Fire Unlikely.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 4 - 6 Feet (**Mod**)

Crowning Potential: 3 - 5 (**Mod**)

Slope Percent: 31 + (**Mod**)

Aspect: South (**High**)

Elevation: 2040 - 4000 (**High**)

Protection Capability ratings are:

InitialAttack: 11 - 20 minutes (**Mod**)

Suppression Complexity: Complex (**High**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface

0-100 Dwellings/structures

## Community 5: Cooidge Dam/BylasRan Part II

Community Values are characterized:

Recreation: Developed recreation site within or adjacent to area (**High**)

Administrative

Wildlife/Fisheries: Highly significant habitat. (**High**)

Range Use

Watershed: Stream Class I, II. Rocky, little riparian vegetation. No specific water use. Low hazard. (**Mod**)

Forest/Woodland: Standing timber/woodland on 25% or less of area (**Low**)

Plantations

Private Property: Threat to structures and property (**Mod**)

Cultural Resources: Minimal archaeological/historical findings, potential for Native American use. (**Mod**)

Special Interest Areas: No Special Interest area within or adjacent to the area (**Low**)

Visual Resources: Partially retain existing character. (**Mod**)

T&E Species: Species present. (**High**)

Soils (Erosion): Moderately erodable (EHR 4-12). (**Mod**)

Airshed: Low receptor sensitivity (**Low**)

Vegetation

## Community 6: Cutter/N-S Globe Part I

Community 6 is located within Compartment 3 (FWA\_SCA\_WUI), and its WUI type is best characterized as Intermix. The community is potentially threatened BY public land. The community is a potential threat TO public land. The characteristics of the community indicate that: Catastrophic Fire Possible.

Fuels Hazard characteristics are rated:

Fuels (flame length produced): 4 - 6 Feet (**Mod**)

Crowning Potential: 6 + (**High**)

Slope Percent: 0-20 (**High**)

Aspect: South (**High**)

Elevation: 2040 - 4000 (**High**)

Protection Capability ratings are:

InitialAttack: 11 - 20 minutes (**Mod**)

Suppression Complexity: Complex (**High**)

Ignition Risk factors include:

Population Density - Wildland Urban Interface

301-500 Dwellings/structures

## Prevention Options Considered

Code	Description
CURR	Current, 2004-2009
HIST	Historical/Pre-2004
PLANI	New Plan-2010
PLANII	2011
PLANIII	2012
PLANIV	2013
PLANV	2014

For this Prevention Plan, the option PLANI (New Plan-2010) has been selected.

# Budget Development

## Personnel Costs:

Personnel costs were calculated using a figure of \$.00 per month. RAMS calculates the amount of time required to complete the work outlined in the Prevention Program, and derives the personnel costs using this figure.

## Expense Items:
