2008 HOME USE  
PINE POLE CUTTING AREAS

**LOCATION:**

Two (2) areas are marked for home use pine pole cutting.

**AREA 1:** Hilltop Area (SEE ATTACHED MAP, for location)

**AREA 2:** P.O.P. Area (SEE ATTACHED MAP, for location)

**MARKING: ONLY CUT TREES MARKED WITH BLUE PAINT**

Trees to be cut are marked with two **BLUE** marks.

One mark at chest height.

One mark at ground level.

**FALLING AND STUMP HEIGHT:**

Before cutting a tree, look for a way to avoid hitting other trees. Trees that are damaged can die. Any trees or branches that fall on a road must be cleaned up immediately. Do not leave any tops or branches hung up in other trees.

Stumps shall be as close to the ground as possible, and in no case, higher than 8 inches on the downhill side. Cut stumps flat, not pointed.

**SLASH TREATMENT:**

Any parts of the tree (stems, branches, tops) that are four (4) inches in diameter and larger, that you are not taking, must be cut up into pieces, three (3) feet long or less. Chop up branches, so that they do not stick up more than 18 inches above the ground. Scatter the slash, so that it is not in a big pile. Do not leave any slash within four (4) feet of the base of all leave trees.

**PROTECTION OF STREAMS AND STREAM-SIDE AREAS:**

Do not drive your vehicle or any equipment through streams or near the edge of streams.
